

Project Snapshot | Male Characters

Format: Multicast audiobook

Genre: Sci-fi adventure with humor

Tone: Upbeat, witty, irreverent

Word Count: approx 12,000

Roles: 3 main male characters + 12 minor roles (minimal lines)

Production Context

This is a multicast production with a female narrator already cast and recording. An editor/audio engineer is attached and will handle mastering, sound consistency, and cleanup. For these roles, we're simply looking for the right voice and personality for the male characters.

Story Vibe

This is a character-driven sci-fi story where humor and action run side by side. Think sharp dialogue, emotional momentum, and characters who keep their sense of humor even when things go sideways.

The protagonist is a snarky, impulsive female lead who tends to overestimate her odds of success and jump in anyway. The male characters react to this energy in different ways.

Audition Notes

- One take per character is fine
- We're looking for distinct, characterful voices that bring personality to the roles.

Optional: To get a sense of the tone and pacing, you're welcome to listen to a short, unlisted narration sample here: [\[YouTube link\]](#)

We're excited to hear your take and appreciate you spending time with the characters.
